

August 1, 2022

For over twenty years New Generation Devices (NGD) has been at the forefront of veterinary technology, and today we're delighted to announce that we are joining the Movora Group, a leading global provider of veterinary solutions and products.

What does this mean for you? By joining we will add to the expanded and experienced Movora team already in place that is dedicated to serving the needs of growth-oriented veterinary hospitals like yours. However on a on a day-to-day basis it's business as usual with our product and support procedures remaining unchanged, only now we have new and even greater resources and capabilities to continue delivering faster solutions for you and veterinary surgeons around the world.

What does this mean for us? The entire NGD team is now a part of the Movora family. Our head office remains in Naples, Florida and we will continue to lead this dedicated and talented team which is firmly committed to the practice of "one medicine."

Our story continues. When Alex and I launched NGD in 2001 our mission was to change animal welfare one device at a time by developing and delivering the best in veterinary technology. We also like to think that along the way we helped solve some other challenges by assisting veterinary surgeons find the right balance between what's best for their patients and their business, Movora shares this mission and approach. Joining forces with a company as passionate about animal welfare as we are will take us into the next chapter in our story.

Thank you! I want to thank you for putting your trust in us throughout our journey. For NGD, it will always be about the customer and we come to work every day for you. Everyone on the team is dedicated to making animal welfare better and easier for you and this commitment is stronger than ever during this exciting time.

Regards,

Michael Khowaylo
